00 SUMMARY

Enterprise engagement and operations leader with 8 years managing a \$14M+ annual client portfolio at GLG — a PE-backed global expert network. Built the internal infrastructure that makes high-complexity, multi-stakeholder delivery repeatable: health scoring systems, renewal pipeline architecture, Salesforce dashboards, CoE playbooks, and Agile-based performance cadences. Now deepening the analytical side of that work through the Google Data Analytics Certificate (completed May 2026) and Google Advanced Data Analytics Certificate (in progress), with two published Kaggle projects applying Python, feature engineering, logistic regression, and cohort analysis to real-world retention problems. PSM I certified. Daily AI tools user across Claude, ChatGPT, Gemini, and in-house LLM workflows. Open to engagement manager, CS operations, and BizOps roles at data-driven companies.

01 CORE COMPETENCIES

Engagement	Enterprise Portfolio Management · Full Lifecycle Ownership · Executive Stakeholder Engagement · Onboarding & Activation · Adoption & Value Realization · Retention & Renewals · Expansion & Upsell · QBR/MBR Facilitation
Delivery	Cross-Functional Program Management · Agile / Scrum (PSM I) · Sprint Planning · Risk Mitigation · Escalation Management · Playbook Development · Change Management
Analytics	Python (pandas · numpy · seaborn · matplotlib) · scikit-learn · SQL / BigQuery · Logistic Regression · Feature Engineering · Classification Modeling · Cohort & Segment Analysis · EDA · Google Analytics 4 (certified) · Looker Studio
Tools & AI	Salesforce (cert in progress) · Kaggle · Google Apps Script · Power BI · Claude · ChatGPT · Gemini · Copilot · In-House LLM Workflows · Notion · Advanced Excel

02 PROFESSIONAL EXPERIENCE

Senior Manager, Client Solutions (Customer Success) · GLG · Austin, TX Oct 2023 – Present

- Own end-to-end engagement lifecycle for a \$14M+ enterprise portfolio — managing onboarding, adoption, health monitoring, renewal negotiations, and strategic account growth across Deloitte, Accenture, Gartner, KPMG, AlixPartners, Kearney, and Roland Berger from a single accountable position.
- Spearheaded a 5% YoY growth strategy across the global professional services and advisory portfolio, identifying expansion signals through usage data, sponsor mapping, and structured stakeholder engagement.
- Built Salesforce health scoring dashboards and automated reporting that reduced reactive escalations and gave leadership a live view of account risk across the full portfolio.
- Deployed AI-assisted workflows using Claude, ChatGPT, and in-house LLM tools to accelerate QBR prep, escalation drafts, and data synthesis — adopted across the broader team under personal license.
- Designed SOW-based delivery frameworks for high-complexity, multi-stakeholder engagements across consulting, financial services, and technology verticals.

Manager, Client Solutions — Team Lead · GLG · Austin, TX Mar 2022 – Oct 2023

- Managed a team of client solutions specialists while carrying a personal enterprise book — bridging IC delivery and people management during a high-growth phase.
- Founded and scaled an internal Center of Excellence (CoE): built playbooks, onboarding templates, and Agile-driven performance cadences adopted team-wide.
- Led cross-functional coordination with product, legal, and operations to resolve complex client escalations and protect retention in a high-touch model.
- Developed renewal forecasting models and pipeline tracking in Salesforce that improved quarterly accuracy and provided cleaner visibility into at-risk accounts.

Associate → Senior Client Solutions Manager · GLG · Austin, TX Jul 2018 – Feb 2022

- Managed 20–30+ concurrent enterprise engagements simultaneously — building the portfolio triage, prioritization, and multi-stakeholder management instincts required to sustain quality at high volume.
- Generated \$1M+ in annual revenue expansion within a flagship account through strategic relationship development, use-case broadening, and a large-scale adoption campaign reaching 700+ stakeholders.

03 CERTIFICATIONS & PROJECTS

Google Data Analytics Professional Certificate · coursera.org/verify/professional-cert/HRA1SDNA2WE5

Google / Coursera · May 2026

Project 1: Wearable Dropout — Behavioral Signals Before Users Go Inactive · *GDA Capstone* · Python · BigQuery SQL · LifeSnaps Dataset · kaggle.com/samievargas/sv-wearable-dropout-behavioral-signals

- Analyzed a peer-reviewed longitudinal Fitbit dataset (71 users, 4+ months, LifeSnaps / Scientific Data 2022) using Python and pandas to identify early warning signals of wearable platform disengagement across two seasonal cohorts.
- Engineered weekly engagement metrics and a dropout flag from raw sensor data; identified 26.8% dropout rate with user divergence beginning at week 4 — 2–3 weeks before full disengagement — creating an actionable early intervention window.
- Discovered rising resting HR (+3 bpm, weeks 3–6) and declining sleep logging frequency as passive, automatically-collected predictors of dropout requiring no user action to generate.
- Delivered 3 product recommendations with specific data-backed intervention thresholds for a simulated Google Fitbit User Retention team.

Project 2: Customer Churn Signal Analysis — The Fiber Paradox · *Independent Portfolio Project* · Python · scikit-learn · IBM Telco Open Dataset · kaggle.com/samievargas/ibm-telco-customer-churn

- Independent data analytics project using the publicly available IBM Telco Customer Churn dataset (Kaggle, CC0) — not affiliated with IBM. Built to apply retention analysis techniques from 8 years of enterprise CS work to a structured data problem.
- Identified a "Fiber Paradox": premium Fiber Optic customers churning at 2× the rate of DSL users (42% vs 19%) despite higher monthly spend — a counterintuitive signal surfaced through bivariate EDA and logistic regression coefficient analysis.
- Engineered a composite high-risk flag (new customer + Fiber Optic + no Tech Support + month-to-month contract) that predicts churn-prone profiles a CS team can surface in any CRM without ML infrastructure.
- Built a logistic regression classifier using scikit-learn (ROC-AUC: ~0.84); extracted feature importance coefficients to rank churn drivers and retention signals; delivered 4 prioritized business recommendations with specific outreach triggers.

Google Analytics Certification (GA4) · skillshop.credential.net — ID: 182987115

Google / Skillshop · May 2026

Google Advanced Data Analytics Certificate · Google / Coursera · In Progress · Est. Q3 2026
