00 — SUMMARY

Summary

Enterprise client engagement and operations leader with 8+ years building the programs, systems, and teams that drive adoption, retention, and growth at scale. Accountable for a \$14M+ annual book across top-tier global accounts — managing full engagement lifecycles, 2–3 annual contract renewals, and a 5% YoY growth strategy from a single accountable position. Builder at heart: founded a Center of Excellence from scratch, designed org-wide delivery playbooks and health tracking infrastructure, and consistently creates scalable frameworks that outlast individual engagements. Certified Scrum Master (PSM I) with deep Agile/Scrum delivery experience, daily hands-on use of Claude, ChatGPT, Gemini, and in-house AI tools to automate workflows and build AI-powered processes at scale, and a Google Data Analytics certificate with a published Python capstone in health tech behavioral analysis.

01 — CORE COMPETENCIES

Core Competencies

Engagement	Enterprise Portfolio Management · Full Lifecycle Ownership · Executive Stakeholder Engagement · Onboarding & Activation · Adoption & Value Realization · Retention & Renewal · Expansion & Upsell · QBR/MBR Facilitation
Delivery	Cross-Functional Program Management · Agile / Scrum · Sprint Planning & Retrospectives · Kanban · Hybrid Waterfall · Risk Mitigation · Escalation Management · Playbook Development · Change Management
Operations	Health Dashboard Design · Pipeline & Forecast Tracking · Account Health Scoring · Process Optimization · KPI Reporting · Data Analysis · Continuous Improvement
Tools & AI	Salesforce (cert in progress) · Google Apps Script · Power BI · Tableau · Python (pandas · seaborn) · GA4 (certified) · Claude · ChatGPT · Gemini · Copilot · Advanced Excel

02 — PROFESSIONAL EXPERIENCE

Professional Experience

Senior Manager, Client Solutions (Customer Success)

Oct 2023 – Present

GLG · Austin, TX

- Own end-to-end engagement lifecycle for a \$14M+ enterprise portfolio — managing onboarding, adoption, health monitoring, renewal negotiations, and strategic account growth across Deloitte, Accenture, Gartner, KPMG, AlixPartners, Kearney, and Roland Berger from a single accountable position.
- Design and execute scalable engagement programs: build standardized onboarding sequences, health checkpoints, engagement templates, and one-to-many delivery frameworks that maintain quality across a large, diverse account population without requiring bespoke attention for every touchpoint.
- Build and maintain custom health dashboards in Salesforce, Power BI, and Tableau to track engagement yield, pipeline health, renewal probability, and risk indicators — enabling proactive, data-driven intervention before churn events or delivery failures occur.
- Manage 2–3 annual contract renewal cycles; structure timelines, negotiate terms, forecast renewal probability, and maintain accurate pipeline data in Salesforce to protect retention and inform revenue forecasting.
- Drive 5% YoY portfolio growth strategy and revenue achievement against quarterly targets (~\$3.5M/quarter); identify expansion opportunities through use-case broadening, stakeholder mapping, and consultative engagement with senior client decision-makers.
- Apply Agile/Scrum delivery methodology across cross-functional work — facilitate standups, sprint planning, and retrospectives; manage dependencies and maintain delivery momentum across complex, multi-stakeholder environments.
- Leverage AI tools (Claude, ChatGPT, Gemini, Microsoft Copilot, in-house GPT/Claude-based tools) daily to automate account analysis, personalize communications at scale, streamline workflows, and build AI-powered processes independently under personal license.

Manager, Client Solutions — Team Lead

Mar 2022 – Oct 2023

GLG · Austin, TX

- Founded and scaled a Center of Excellence for client engagement operations: built lifecycle playbooks, onboarding guides, escalation frameworks, and engagement templates from scratch — all adopted org-wide, reducing new manager ramp time and standardizing delivery quality across the team.
- Implemented Kanban and sprint-based team performance systems; designed performance boards, facilitated daily standups and retrospectives, and built structured coaching dialogues that improved delivery consistency across direct reports.
- Developed 3–4 client-facing managers through regular coaching, individual performance tracking, and structured feedback cadences; translated organizational priorities into team-level delivery operations and individual development goals.

Associate → Senior Client Solutions Manager

Jul 2018 – Feb 2022

GLG · Austin, TX

- Managed 20–30+ concurrent enterprise engagements simultaneously — building the portfolio triage, prioritization, and multi-stakeholder management instincts required to sustain quality at high volume.
- Generated \$1M+ in annual revenue expansion within a flagship account through strategic relationship development, use-case broadening, and a large-scale adoption campaign reaching 700+ stakeholders.

03 — CERTIFICATIONS & PROJECTS

Certifications & Projects

Google Data Analytics Professional Certificate · Google / Coursera

May 2026

Capstone: Wearable Dropout — Behavioral Signals Before Users Go Inactive ·

kaggle.com/samievargas/sv-wearable-dropout-behavior

- Analyzed a peer-reviewed longitudinal Fitbit dataset (71 users, 4+ months, LifeSnaps / Scientific Data 2022) using Python and pandas to identify early warning signals of wearable platform disengagement across two seasonal cohorts.
- Engineered weekly engagement metrics and dropout flag from raw sensor data; identified 26.8% dropout rate with user divergence beginning at week 4 — 2–3 weeks before full disengagement — creating an actionable early intervention window.
- Discovered rising resting HR (+3 bpm, weeks 3–6) and declining sleep logging frequency as passive, automatically-collected dropout predictors requiring no user action to generate.
- Delivered 3 product recommendations with specific data-backed intervention thresholds for a simulated Google Fitbit User Retention team, including a week 4 engagement alert, resting HR trend nudge, and sleep logging absence prompt.
