00 — Summary

Eight years building the operational infrastructure that makes enterprise client relationships work at GLG — a PE-backed global expert network. Managed a \$14M+ annual book of business across advisory, professional services, and technology organizations. Now deepening the analytical side: Google Data Analytics certified, GA4 certified, PSM I certified. Projects span behavioral dropout prediction, customer churn modeling, and public health compliance analysis from real-world messy API data. Targeting engagement management, CS operations, and analytics-adjacent roles at data-driven companies.

01 — Work Experience

GLG Austin, TX

Jul 2018 – Present

Senior Manager, Service

Oct 2023 – Present

- Lead a team of client solutions managers across a \$14M+ enterprise book — setting KPIs, running weekly performance reviews, and coaching to retention and growth targets.
- Spearheaded 5% YoY growth strategy across a portfolio of global professional services and advisory clients, identifying expansion signals through usage data and stakeholder mapping.
- Built Salesforce health scoring dashboards and automated reporting that reduced reactive escalations and gave leadership a live view of account risk.
- Deployed AI-assisted workflows (Claude, ChatGPT, in-house LLM tools) to accelerate QBR prep, escalation drafts, and data synthesis — adopted team-wide under personal license.
- Designed SOW-based delivery frameworks for high-complexity, multi-stakeholder engagements across consulting, financial services, and technology verticals.

Manager, Client Solutions — Team Lead

Mar 2022 – Oct 2023

- Managed a team of client solutions specialists while carrying a personal enterprise book — bridging IC delivery and people management during a high-growth phase.
- Founded and scaled an internal Center of Excellence (CoE): built playbooks, onboarding templates, and Agile-driven performance cadences adopted team-wide.
- Led cross-functional coordination with product, legal, and operations to resolve complex client escalations and protect retention in a high-touch model.
- Developed renewal forecasting models and pipeline tracking in Salesforce that improved quarterly accuracy and visibility into at-risk accounts.

Associate → Senior Client Solutions Manager

Jul 2018 – Feb 2022

- Grew from IC to senior managing complex enterprise accounts across consulting, financial services, and technology — promoted twice in four years.
- Built custom Salesforce reporting infrastructure for account health visibility that became the team standard.
- Consistently achieved top-tier client satisfaction scores recognized for combining operational rigor with high-touch relationship management.

02 — Analytics Portfolio

Austin Food Safety Compliance Analysis

Python · pandas · matplotlib · seaborn · folium · Socrata API · Kaggle · kaggle.com/samievargas/atx-foodie-inspection

- Fetched 4,300+ health inspection records from the City of Austin Open Data Portal API, resolving ghost location mismatches through iterative address sanitization and zip normalization.
- Built a brand compliance scorecard (weighted and unweighted) across 84 mapped local brands, isolating national chains and applying a frequency-driven brand normalization strategy.

- Identified measurable operational drift: inspection scores decay statistically at the 5th–6th cycle, and follow-up inspections average 8 points below routine visits — confirming the corrective action loop is broken.
- Produced a folium choropleth map, zip code compliance bar chart, score volatility quadrant scatter, seasonal trend line, and serial offender risk chart for a stakeholder-facing findings summary.

Wearable Engagement & Fitness Dropout Prediction — Google Data Analytics Capstone

Python · pandas · matplotlib · BigQuery SQL · Looker Studio · [kaggle.com/samievargas/sv-wearable-dropout-behavioral-signals](https://www.kaggle.com/samievargas/sv-wearable-dropout-behavioral-signals)

- Analyzed the LifeSnaps/Fitbit longitudinal dataset (71 users, 4+ months) to identify behavioral and physiological signals that predict fitness goal dropout.
- Surfaced Feb/March burnout patterns, cadence load spikes, and HRV trends as early dropout predictors — informed by personal Garmin training data and 8 years observing behavioral dropout in enterprise clients.
- Built in Python and BigQuery SQL; findings presented in Looker Studio and a Google Slides narrative deck.

IBM Telco Customer Churn — The Fiber Paradox

Python · pandas · seaborn · scikit-learn · logistic regression · [kaggle.com/samievargas/ibm-telco-customer-churn](https://www.kaggle.com/samievargas/ibm-telco-customer-churn)

- Analyzed 7,000+ customer records to identify churn drivers; surfaced a 'Fiber Paradox' — premium fiber customers churning at 2× the rate of lower-tier users.
- Engineered a composite risk signal (new customer + fiber + no tech support) that surfaces high-churn candidates in any CRM without ML infrastructure.
- Built logistic regression classifier; interpreted coefficients to produce actionable retention recommendations modeled on 8 years of enterprise CS patterns.

03 — Skills & Tools

ANALYTICS	Python (pandas · numpy · seaborn · matplotlib · scikit-learn) · SQL · BigQuery · EDA · Feature Engineering · Logistic Regression & Classification Modeling · Cohort & Segment Analysis · Behavioral Pattern Analysis · Time Series & Longitudinal Analysis · Weighted Scoring & Statistical Normalization · API Data Ingestion (Socrata REST) · Entity Resolution & Data Cleaning
VISUALIZATION	matplotlib & seaborn (advanced) · folium (geospatial choropleth) · Tableau · Power BI · Google Looker Studio · Google Slides (data narrative decks)
TOOLS	Google Analytics 4 (certified) · Google Apps Script (2 self-built apps) · Kaggle Notebooks · Salesforce (cert in progress) · BigQuery · Google Sheets (advanced)
OPERATIONS	Engagement Lifecycle Management · Health Scoring Architecture · Playbook & CoE Design · SOW Management · Renewal Pipeline Architecture · Cross-Functional Alignment · Agile / Scrum (PSM I)
AI & PRODUCTIVITY	Claude · ChatGPT · Gemini · Copilot · In-house LLM workflows · Prompt Engineering · Notion · Jira · Asana

04 — Credentials

Google Analytics Certification (GA4)	Google · Skillshop · May 2026	Complete
Google Data Analytics Certificate	Google / Coursera · May 2026	Complete
PSM I — Professional Scrum Master	Scrum.org · May 2026	Complete
Fundamentals of Predictive Project Management	Project Management Institute · 2026	Complete
Six Sigma White Belt	2026	Complete
Google Advanced Data Analytics Certificate	Google / Coursera · Est. Q3 2026	In Progress
Salesforce Administrator Certification	Salesforce / Trailhead	In Progress
dbt Fundamentals	dbt Labs	In Progress

05 — Education
